

Kendra Mumaw

We have made it so far without AI, we do not need it now. If you take a look outside there is life. Life is the most amazing thing to ever exist, from the smallest insect to the biggest tree, all is beautiful. Project Jupiter will destroy so many life forms and make the temperatures even more hotter than they are now. The air quality will decrease in safety for all or most life forms, who will use the data center if everyone is dead? Project Jupiter shouldn't pass.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
