

Josh Plante

A data center of this scale may bring jobs and wealth to New Mexico but it's also going to bring diseases and incurable sickness to so many people from heavy metals and emissions being leaked into the ground water and surrounding area. Methane fuel cells and pipelines will leak out eventually and it will be your fault for not stopping this!!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
