We as people are not meant to rely on AI we are meant to BE the AI. We should not let our brains rot due to the dependency on AI. more data centers not only increases our depends but damages the environment around us a lot quicker than we already are, for the good of humanity, and our children, and their children. Do not build this data center.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
