

Brittney Kerr

Keep data centers out of New Mexico! NM is known for its mountains, vistas, wildlife, and community! Allowing a corporation to green wash the Jupiter project will be detrimental to us. Allowing them to hoard water and energy from already struggling families will cause our communities to collapse. New Mexico true means standing up for those who cannot speak, and building this data center silences our most vulnerable. Do the right thing, VOTE NO. Thank you for your time and attention to this matter!
