

Layla Evans

I am Layla, I am not from America but the pain this issue brings the world globally is immense. The earth we live on does nothing but provide for us, yet we are the only things that choose to and continue to destroy the earth. I feel, as the new generation, we must do everything in our power to protect and shield the earth from what the earlier generations have caused. The generic use of AI is unacceptable and humiliating, as someone who frequently used AI before becoming aware of the long term and short term effects of it, I am ashamed. It is our responsibility as humans to protect this earth, not destroy it.
