

Tanya Camargo

I am writing to express my complete opposition to Project Jupiter, which I believe will not benefit our community. I don't believe that all those jobs they are promising truly exist, as many of them will be remote and will likely go to out of state employees. The damage to our environment alone is not worth the cost. Social media and pictures and old emails are not worth losing what little resources we have. Project Jupiter is making all these promises without delivering any plans to show how they will keep those promises. How are they going to improve water systems that don't exist because we don't have any water? Are they somehow going to create water? How are they going to store and dispose of fuel cells? How are they going to support the environment? They say they will do these things but can't tell us how. That's manipulation.

Sincerely,
Tanya Camargo
