

Vivian Krenz

Please do not allow Project Jupiter to go forward. It is unbelievably reckless to try to put a data center in a desert area that is already under drought conditions. Water is a precious resource and it should not be going to data centers. As a New Mexican resident I am thoroughly opposed to this project. There is no economic or technological gain that is worth the damage to the environment and communities that this project will cause. I vote no!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
