I am concerned about the unprecedented levels of waste and pollution that are predicted to come from Project Jupiter without any oversight, regulation, or consideration for the local and global communities and their environment, effects on health, consideration, or approval. I agree with our NM and West Texas communities as a whole against the project with its current lack of regulation.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
