

Layna F.

Dear NMED staff, My name is Layna. I do not reside in New Mexico whatsoever I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. There's already enough happening to our air pollution and I'm sure nobody wants this unknown powered AI center in their backyard. Not to mention the land they're building on is struggling enough and if this experimental center goes on then it will harm the people near by it. AI data centers are already harmful as is and it's taking all our water. But it's not just AI it's also other companies and you need to realize that this isn't the greatest idea for the people. Everyone deserves to be heard no matter what so please reconsider this and choose the community instead.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
