

Charles Huitt

Unlike most of the form "cut and paste" or auto generated comments I have seen, I am writing to express my opposition to Project Jupiter. This project has substantially changed from the original project and in opposition to the air quality and water resources of the area. I am not opposed to data centers. But, their location needs to be carefully weighed against the impact on the environment and the people living in this area. Our air and water are scarce resources and this will have an immense impact on both. I do not support Project Jupiter and urge not to approve moving forward.
