Globally, AI usage is an issue. Outside of environmental issues which im sure everyone is already aware of, ai is being used to sexualise and harm women and children. We dont need more ai, its adding nothing to our society and is creating dependence, meaning the entire next generation arent going to succeed without the use of ai systems. No more data centres, no more AI.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
