

Chris .

We shouldn't be doing this. This is such a major problem. This is going to drain peoples waters, and it will expand to other cities and small town areas and not to forget the most important thing (ECOSYSTEM'S). You guys want to build more stuff and lie to us that it's going to do better I don't understand why we keep doing this instead of looking forward other ways or other problems that people many ask you people but don't listen. STOP THE JUPITER PROJECT
