

Jay Veater

I'm tired of submitting these things pretending to be nice to the people who want to poison the air and water in New Mexico. If you care about the land, the people or even just the planet itself you would reject everything project Jupiter. Including this air quality permit. Otherwise you fail not only New Mexico, but the generations beyond us that you have doomed.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
