

Alex Herrera

I am furious! There is so many places in New Mexico that is far away from PEOPLE. A location that will not affect our water supply, our environment, endless pollution and toxins! This was rushed through without approval from citizens. This is going to affect my property value, my electric bill. my water bill, the environment and how sick I'm going to get because I'm already suffering from autoimmune illness from all the toxins in the air and food. I really loved my city and the people who ran it and protected it and kept it clean! Who got paid off! What the hell is going on! Selling out our quality of life. Destroying our health. This is allllll about money and not about the Citizens well-being. This is disgusting and I'm furious. how could you do this to Dona Ana citizens! The Brown water held up in Congress. The destruction of communities. The pollution the toxins. We don't have any water!!! What in God's name are you thinking? You know darn well that it's going to take a lot of water to clean these systems out. We don't need data centers. This is all about money, not people. I'm going to have to sell my house and move away. I cannot handle toxins. I'm already sick. I'm so furious! Supposed to represent the Citizens of Dona Ana County! Instead you hid it from us! It's criminal!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
