

June Boulanger

Reject these permits. We don't want you to sell the water, environment, and wellbeing of New Mexicans to Oracle. Fuel cell technology is a nebulous change at best, and very likely a deliberately misleading one. It doesn't matter what it's powered by. We do not want an AI data center here and, even if we did, we simply do not have adequate resources for it. Your mission is to "protect and restore the environment" and to "foster a healthy and prosperous New Mexico for present and future generations". Issuing this permit would be in direct opposition to these aims.
