

## Aiden Heany

we cannot allow further development of any ai data centers, especially ones developed in or around communities that can do nothing to adapt or compensate for the terrible effects these centers due to their lack of funding or information on the subject. Developing any single ai data centers means millions of gallons and megawatts taken away from every day people that is necessary for survival. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
