

Libby Markle

Dear Yucca Growth Infrastructure. Your project will cause harm to the earth we live on. Every season it will just get hotter and hotter. I suffer from a heart condition that gets worse every time it gets very hot out.(because of the stress it puts on me.) I can't afford to keep the Ac on all the time due to rising electricity bills. Not to mention the air quality will get even worse, I have small lungs as well. This alone will do so much damage that I'm sure everyone will suffer from your silly actions. I can't afford anymore stress to my body. Please take note of this.
