

Jan Gilbrecht

I am writing to oppose the permit application for Project Jupiter. No one paid or coerced me to write this. I am deeply concerned about the environmental, social and long term economic impacts of this massive data center on the land and the people of New Mexico. This is just one more get rich quick extraction scheme that is being rushed in without careful consideration. I support a moratorium on data centers such as the planned Project Jupiter until our legislature has the opportunity to fully assess long term impacts.
