

Hayden Hoffman

Honestly it does not matter where I'm at, this project needs to be denied and stopped this is wrong in every way possible. We don't need Ai, everyone was doing fine without it and getting through life. All Ai and this stupid stuff the government wants to build is useless, the government just wants to take over and destroy the planet they do not care what happens to us nor the planet. Ai just makes people not realize that everything Ai is doing anyone can do all these people using it for school, work, etc. were doing fine in school and work before Ai. AI IS BAD. And if you expect it and think this is okay you need help and you are just a terrible person, this is not OUR home this planet is home to animals not us we are just here supposed to protect them and the earth. I pray for everyone who thinks this is okay and I pray you come to your senses and realize this is wrong God would not approve of this, This is not what he wanted to happen. Use your brains and think about what you're really doing before you do it. I'm young still I have so much to live for so many people do and continuing with all these stupid plans is going to ruin everyone's life's because what? you "need ai" you need just need God.
