

Adam Harb

I do not support any aspect of Project Jupiter. It has been forced upon this citizenry by authorities who have been bought out, it sacrifices our incredibly fragile water system for no benefit to the citizens of New Mexico; if allowed to continue, the project will lead to noise pollution, environmental devastation, exploitation of our state's dwindling water resources and an insult to our people; I reject fully the project's lies that it can create any significant amount of jobs, even if it could, this is labor that actively harms the health of our state and its citizenry. I will continue to be vocal against the project, I will continue to refuse any political support to candidates that let this project continue, and I will continue to publicly shame both its deceitful and deceived advocates.
