

Abigail Carr

I am a 15 yr old with a strong opinion and I understand the severity of building a new non-beneficial water wasting data center while our Rio Grande River is dried. This has no benefits for the people , what about our water ? What about the land? What about the animals that are habituated there? The CEO'(s) of OpenAI , ChatGPT, Gemini, they're horrible people and they should not have a place in New Mexico to call their own . People will loose jobs from this , we will have a crazy decrease in healthy 'good' water . I am only one voice but I am hoping there can be a change within building the data centers and for them to build something beneficial to the people. For the sake of the people please do not build this myopic machine.
