

Brittany Bloch

As a lifelong citizen of Doña Ana County and a lifelong observer of the natural resources, it really disturbs me that this company can continue to work the system and that my county commissioners (who are obviously annoyed by the outcry from their constituents) are willing to sell out our air, our water, and our temperatures for out of state interests. These permits shouldn't even need to be continually complained about by the people who actually live here and work here and pay our taxes here. We should be uplifting and protecting our community. We Should be protecting our resources and fighting for protections to them. Say no to everything related to these data centers in NM!
Thank you.
