

Sam Gusta

I think this is completely unacceptable. I have serious concerns about watery usage in a desert, as well as energy requirements. This does not belong in New Mexico. This company has a history of dumping illegal waste. This application should be denied.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
