

Jessica Pruett

Im already seeing local farmers and agriculturalists drilling deeper for water that isn't here. I hear them argue about who has rights to what water. Project Jupiter will literally keep millions of gallons of OUR WATER locked away and out of the natural water cycle. We already go most of the year without seeing rain or snow and now even less water will be returned to the earth and throw us further out of balance. Instead of going months without rainfall we can go years. That's less snowmelt from up north and less water for the people, animals and environment. All for what? Government surveillance? Ai chat bots? I would rather loose all access to ai than have to deal with the fall out of corporate greed or government overreach. Please for the love of god stop project Jupiter so I can raise my children here in peace. I don't want to leave my home. Nor can I afford to leave. Please see the people that live here. See our culture. See our desert as more than just sand and space to develop.
