

Mariana Gemoets

This is an absolutely terrible project that no New Mexico resident is in support of. We live in a desert, the toll this would take on our surrounding environment is vast. This project is powered solely by greed and in moving this project forward greed wins. Please do not move the project forward for the sake of the animals, plants, and people. Soon, especially with the promotion of this project, New Mexico will be uninhabited simply for the sake of profit. That is the most disgusting, crude, and selfish thing. Imagine, simply for profit, you nod your head to the destruction of literal life. Please don't let this project through. It is evident and factual the effects of this project will have negative consequences. Think long term.
