

Brodie Albert

Im a teenager currently in immense distress with the state of the world. The future scares me, when it shouldn't. Its all moving too fast with global warming, wars, and more. Im doing what I can to save the earth, and making it suitable for all life on earth. Every action counts. And i know you would be unhappy to know that if Project Jupiter goes through, it will contribute to mass extinction across America and widely throughout New Mexico. You would have millions of dead on your hands, and contribute to the current CO2 emissions which are way out of hand. You would be harming everyone, including your own family. I hope you take these points and our future into consideration. Thank you.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
