

Janet Nordmann

I do not support the passage of the Air Quality permit. Why? It is my belief that this company has failed miserably to advise the public of the impact to their health that this system will cause if the permit is approved by NMED. Has the company done its due diligence by supplying facts that either prove or disprove "our" health concerns? Can NMED answer this question?

It appears to me that the well-being of people, the well-being of the environment (air we breathe and water we use) are at the bottom of the list of concerns. Jobs, however, have been the primary focus of elected officials and of the companies affiliated with this data center project. Jobs for New Mexico residents would be welcome but not over the well-being of the people and the environment of all of Dona Ana County and beyond. After all, the very people who may gain employment may be some of those whose health ends up negatively impacted.
