PROJECT JUPITER IS A CLIMATE DISASTER!!! Developers want us to trust that building one of the largest proposed data centers in the world, wouldn't terrorize the clean waters our communities depend on to survive. Public comments like this will be our only chance to stop it! The public should be given 60 days to fully understand the gravity of this situation, AND COMMENT ON IT! The air quality permit NEEDS to be denied considering Bloom Energy's illegal history. If this permit is not denied there should be a public hearing in Santa Theresa in both in English and Spanish with an option to get involved virtually. We as a human race will go extinct due to human caused climate change if we go on with Project Jupiter. We CANNOT let greed destroy us and future generations to come IF THERE IS ANY!
