I hate the fact that people think we could just reincarnate. This isnt a fairytale. We dont know if we live once or twice. Cancel project Jupiter. Do anything. Petition? Protest? For me honestly I would KILL for it to stop. Climate change is affecting us. Lots of heat waves that's caused from climate change. We have THREE FUCKING YEARS until this is irreversible. If we don't do anything. We are dead. They think they will survive it while water is slowly disappearing, leaving chemicals in the air (it damages the ozone layer i think) all because of AI. Project Jupiter isnt some insane shit that will help us. It will RUIN the earth. The same earth that gave us water, food and a lot more. I might look like im saying bullshit right now but im just so shocked to the point I cant make a sentence on how this is fucked up.
