

Kasha Sanderson

Please do not allow YGI's application to pass. There are too many unknowns according to environmental law groups, and foul play by Project Jupiter canvassers falsely using New Mexican names to feign support for the project that the microgrid will be enabling. The slim amount of dollars Project Jupiter will put into Doña Ana county is not enough to truly support New Mexicans; it's merely to try and garner public support rather than truly trying to be responsible, and it will cause a lot more damage in the long run. Please do not agree to the microgrid; there will be dire consequences.
