

Ava Goodrich

we are already going through a climate crisis and this will only make it worse by a long shot. Water is a need for people to survive but it will be given to this data center. So citizens will not have any water to drink to live. If citizens do not have essential things to live on how will they work and boost the economy if the data center takes it all? Even though I am not a resident It will still affect me. The climate is gonna change to unlivable conditions and we are all gonna suffer. We only have 1 planet to live on and mars ain't an option.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
