

Liam Covey-Shannon

I am diametrically opposed to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application, as it was submitted with false claims regarding the volume of greenhouse gases produced and the quality index created with the proposed action. It is reprehensible to consider this application as it is reprehensible itself. Approving this proposed action will cause undue and completely avoidable damage to the fragile desert ecosystem, the surrounding communities, and our climate at large. I do not support the consideration for this application and for the good of New Mexicans and the Southwest as whole, must be revoked.
