The new data center is NOT what the community needs. It's what the billionaires want so that they can profit from the suffering of the masses. People who live in Doña Ana Contry have to deal with improper waste disposal and pollution already, the new data center would only make teh situation worse. As if it wasn't enough, this building will not only affect the people who live nearby, but will also impact the already raising climate change and pollution in the whole world. AI was only created to destroy the place that we live, make the population dummer, destroy creativity and make billionaires richer while they exploy the ones below them. WE DON'T NEED PROJECT JUPITER

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
