

Veronica Isabel Romeu Lores

We don't need AI, we never did, we were fine before it and will be fine after it. Most people are against it, you may argue that that's always the case with innovation, but that's a minority of cases anyway! Most of the time the majority is right, THIS is one of those times!!! Everyone hates AI, everyone hates how it affects our planet, everyone hates how these big companies keep pushing this trash down our throats with no regard for our well being, for the well being of the planet we live in. Please stop this before it has drained most of our drinkable water, before it has drained all life from our soils, before it has corroded the young minds of this world and they can no longer think for themselves, please stop this before it is too late. :(

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
