The well being of my family, friends, pets, and natural resources should be more important than a few people that cannot think for themselves and use ai. The ai use is unnecessary and not needed with the improvement of human life. We have ai becoming apart of the education plans because kids in high school cannot read without an assistant, relying on ai to just do the work for them and not use their own minds. There are kids using ai to get to the top of their class and even graduate early. The work they do is not from them.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
