

## Czare Caranto

I am Czare Caranto and I am writing this out urgency to cancel and put a full stop to Project Jupiter. I have been a Florida citizen for almost two decades and over the course the past year, I have seen the devastating impacts that AI data centers have had on our communities. They are compromising and depleting our waters and disrupting the natural environment around it. Our Earth CANNOT take the amount of damage these data centers will do, the state of our environment has already been degraded by mass consumerism, drilling for oil, and the implementation of new condos, resorts, apartments, and we MUST put a stop to this. I urge you to cancel this project for the sake of the Earth and for the sake of our people.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
