

Phillip Paz

As a Las Cruces native, a husband, and a father, I find this a disgrace that the people who were elected to serve the people are serving mega corporations and themselves. Project Jupiter from the start has been a lie. They lied how much water it would take. They lied about job creation. They also failed to mention the impact this would have on the Mesilla Valley especially our water table. Project Jupiter needs to be squashed. We don't want this lying corporations filth here. Our county commissioners need to take a long look in the mirror before they consider their bank accounts. This project will raise our bills and taxes while Project Jupiter gets away with no tax like greedy little rats.
