If this data center is built this would distort the way of life in beautiful New Mexico. If the NMED mission is "to protect and restore the environment and to foster a healthy and prosperous Nm for present and future generations" why would you want this to ruin the beautiful state that you do have? Bloom has dumped toxic waste in places it should not have been there for what do you think is gonna happen to your community? Even then you would need to make a public announcement to Santa Teresa in English and Spanish because those are the two most common languages in nm. This would also lead to the displacement of most of the Dona Ana communities do to government sponsored racism. Thank you for reading my contribution to try and stop this from happening.
