Dont build this center the effect the the environment and the communities nearby or across the world will be detrimental and absolute. There will be no repairing available after this disaster. News such as this reaching and affecting the population of other countries from across the globe is enough of a reason to understand this isn't an isolated or 'selfish' concern, but a genuine one from humanity to those who can impact negatively much stronger than we can and have the ability to do positive much more right now than we can in out hands alone.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
