

Eliete Cassandra

Instead of running away from the problems we have created, we should take responsibility and accountability!! It is not acceptable that we have destroyed what the earth preserved for millenias and destroyed the homes of animals; our ocean are becoming more acidic killing entire ecosystems. The heat waves is killing people animals and more. Wars genocide and hunger is over looked. Do you really think it's okay to just leave behind all of this? NO! we must take action. This is our planet our home. And its our responsibility to take care of it. Please i ask that project jupiter does not take place. Lets work together to make the earth a better place. Watch pocahontas watch the lorax all these movies made to spread awareness and yet you fail to acknowledge that our planet is dying and we are killing and we should be ashamed.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
