This "project Jupiter" will do irreversible damage to both communities, the environment, air quality and water quality. There is no such thing as a sustainable way to build this horrible horrible structure. Why are you allowing this to continue and erode our earth? Have you no compassion or empathy?! This should be stopped immediately for both the future of our planets health and the quality of life for everyday people. Please stop this horrendous projekt.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
