

Rebecca Egan

To Whom It May Concern:

I would like to share my concerns with the potential air quality permit:

- The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.
- The air quality permit application should be denied as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
- Representatives of Project Jupiter have been soliciting comments, even going so far as to post some poor fellow with a tablet in front of my local Albertsons, in order to skew the comments regarding air quality permits. As locals, we simply do not have the money and power to meet this effort and show actual community opinion. As such, a public hearing NEEDS to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually to ensure that community stakeholders are given a fair opportunity to weigh in on this permit. If this is not an option, the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

Regards,
Rebecca Egan
