

## Margot Vos

I don't think you should give the permit for air quality to project Jupiter to build fuel cells. Or build this facility at all. They didn't give anyone a chance to really look at this big project to see if it was gonna work for this community ahead of time. They just started building and then told us about it almost after the fact, I think you should pause the building at this point and make them do a full environmental report that includes air quality, and water quality.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
