

Leigha Gill

The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. extreme heat leads to electrolyte imbalances. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous—many of them at very what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance too grow.
