

Jailyn Perez

Please do not go through with this project as the air quality in Doña ana county is already not the best. Going through with this project will only worsen the air quality which will risk the air and possibly the residents health. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually because the residents that reside here have as much say in the project as the people willing to go through with it.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
