Project Jupiter is unnecessary it is not needed for survival at all and it is absolutely ruining our planet. There is no point of it being made, we've lived without AI for so long and we don't need it. It harms the earth and has little to no benefits. The air quality permit application should be denied and approving this permit would be government-sponsored environmental racism. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Why is Project Jupiter still a thing if there are so many cons but yet so little pros??? Think on that...

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
