AI data centers are extremely dangerous to the well-being of both the Earth and our country. While we are already in a water crisis, AI data centers do nothing except ruined the land that they are placed on and use water resources that we desperately need. Nobody is in support of these we speak against it.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
