Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. There should be an additional 60 days given for the public to review and comment. This is not an act that can be accepted lightly for money, it detrimental to my community, and your people.
