

## Rachel Gallaway

SAY NO! They don't need it. AI needs regulation, not growth. Each state should be able to be a part of defining the big picture of regulation, and use. Why are citizens left out of all major decisions that affect our livelihood, and future for our children??This is BS!! We do not need this level of AI. We do not accept this project! And we the people, do not accept the government making decisions on our behalf.
