

Sarah Drinkwater

As a lifelong resident and citizen of New Mexico, I STRONGLY oppose the approval of this permit and of ANY and ALL permits related to the development of AI or other Data Centers here in New Mexico.

NEVER in my life has the Rio Grande been this dry for this long. Who in their right mind would think that building a massive drain on New Mexico's precious, scant water supply would be a GOOD thing? The only answer I can arrive at is "greedy people" and they wouldn't be in their right mind.

PLEASE, please do what is best for New Mexico, and everyone and everything who lives here, and deny this and every data center permit. ~5k jobs are NOT WORTH IT!
